

The illion difference.

New Zealand's richest data registries of commercial and consumer information.

FACT: illion has competitive advantage with data coverage of younger age demographics (18-35 years of age)

RELEVANCE: Younger demographics are more likely to rent property – you will access the best data to make an informed decision

FACT: illion hold significantly more defaults information in our database, because we are the only Data Bureau in NZ that also provides Debt Collection services

RELEVANCE: Defaults identify individual prospective tenants who have previously been referred for debt collection, indicating a higher risk of future default or credit risk

FACT: illion holds credit information from all industry sectors – including Banking & Finance, Telecommunications & Utilities

illion has unique data comes from Telco, Sub Prime Finance and Utilities markets.

RELEVANCE: A cross section of information from diverse industries provides a truer picture of a prospective tenant's credit worthiness .
